

The Spalding phonogram app is available for \$3.99. Your child can practice all 70 phonograms anytime, anywhere. You can be sure that your child is hearing the sounds pronounced correctly each time. This will empower them to improve their decoding and fluency skills. The app features precise pronunciation for both oral and written phonogram reviews. It allows users to select just the phonograms the students are practicing in class on a given week or they can practice all 70 at once. It is available for both [Apple](#) and [Android](#) devices. This app will benefit anyone learning to read and/or learning English.

This video clip is an overview of the [Spalding Method used at TECS](#). Take a few minutes to see what makes this comprehensive approach to teaching reading, writing and spelling so beneficial to our students.
